As announced in MOF's Committee of Supply ("COS") 2024, Tender Lite will be implemented from end Apr 2024. It will cover tenders with estimated procurement value not exceeding \$1 million for general goods and services first. MOF will be reviewing Tender Lite for ICT and construction buys in following years. Under Tender Lite, there would be fewer contract conditions compared to typical tenders.

The streamlined set of contract conditions for Tender Lite aims to create a more gradual progression from Quotations (simple and few conditions) to Tenders (more and complex conditions), so that businesses which have difficulties in complying with the full Tender requirements now, can consider participating in Tender Lite first. This is to allow businesses easier access to smaller value Government Tenders and build their capabilities before competing for higher value Tenders.
