As announced in MOF's Committee of Supply ("COS") 2024, Tender Lite general goods and services has been implemented from end April 2024. It covers tenders with estimated procurement value not exceeding \$1 million for general goods and services. We have subsequently announced in MOF's COS 2025 that Tender Lite for Construction will be implemented from May 2025. MOF will be implementing Tender Lite for Infocomm Technology (ICT) from end Apr 2026. Under Tender Lite, there would be fewer contract conditions compared to typical tenders.

The streamlined set of contract conditions for Tender Lite aims to create a more gradual progression from Quotations (simple and few conditions) to Tenders (more and complex conditions), so that businesses which have difficulties in complying with the full Tender requirements now, can consider participating in Tender Lite first. This is to allow businesses easier access to smaller value Government Tenders and build their capabilities before competing for higher value Tenders.
